

DECHLOR with Bypass

Residential Flow-through Carbon Units

**BUILT TO GIVE YOU THE BEST QUALITY
WATER FOR YOUR FAMILY.**

- ◇ Sparkling, Great Tasting Drinking Water from any faucet in your home for Less than a penny per gallon.
- ◇ Bathe, Shower, Cook and Clean with Chlorine Free Water
- ◇ Protect your plumbing fixtures, water using appliances and your family from harsh chlorine and chlorine by-products.
- ◇ System design allows from 1 Million to 3 Million gallons of water used before service is needed
- ◇ Mineral tanks are made of non-corrosive material and are warranted for 12 years.

Note: Water Chemistry affects capacity. Our reference is only an estimate.

**Enjoy great tasting
water right from
your faucets!**

Our Dechlor treatment systems use a bituminous-based granular Activated Carbon (GAC) which absorbs the chlorine from the water. This type of carbon is rugged and has incredible ability to hold chlorine and chlorine byproducts for years.

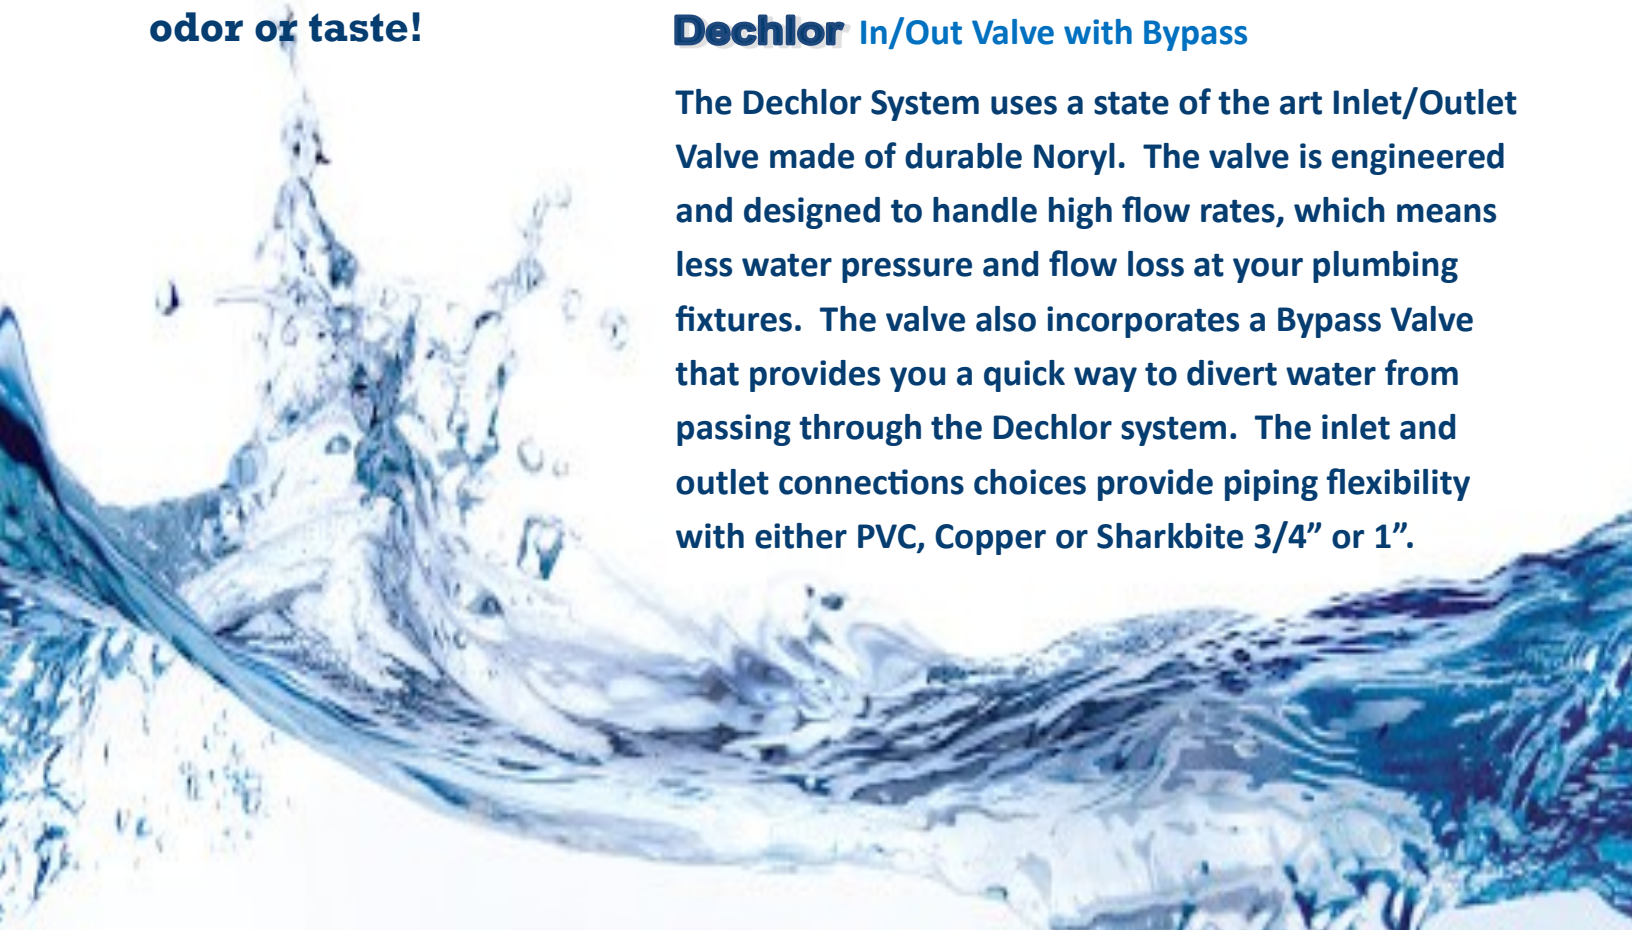

Units are also available with Centaur Carbon

**No more chlorine
odor or taste!**

Dechlor In/Out Valve with Bypass

The Dechlor System uses a state of the art Inlet/Outlet Valve made of durable Noryl. The valve is engineered and designed to handle high flow rates, which means less water pressure and flow loss at your plumbing fixtures. The valve also incorporates a Bypass Valve that provides you a quick way to divert water from passing through the Dechlor system. The inlet and outlet connections choices provide piping flexibility with either PVC, Copper or Sharkbite 3/4" or 1".

Model No.	Service Flow GPM	CF of Carbon	Inlet/Outlet	Tank Size	Total Height	Shipping Weight Lbs.
Dechlor1040BY	6	1	3/4" or 1"	10" x 40"	48"	70
Dechlor1054BY	6	1.5	3/4" or 1"	10" x 54"	62"	90
Dechlor1248BY	9	2.0	3/4" or 1"	12" x 48"	56"	120
Dechlor1665BY	12	4.0	3/4" or 1"	16" x 65"	73"	170
