

MCA Crawl Space Filters

Master Water's MCA Crawl Space filters offer treatment solutions for corrosion, chlorine, taste, odor, discolored water and turbidity through filtration.

	MCA-AC CS UNITS	MCA-AN CS UNITS	MCA-MM CS UNITS
Contaminant Limits	Turbidity \leq 10 ntu Total Chlorine \leq 4ppm	pH \geq 5.6 @ 300 ppm TDS Hardness \leq 10gpg Total Iron \leq 10 ppm Turbidity \leq 25 ntu	Total Iron \leq 20 ppm Turbidity \leq 200 ntu
Application Notes	MCA-AC Crawl Space guidelines are based on dechlorination only.	High Hardness can cause poor neutralizing performance and solidification of media. Iron Bacteria will foul media.	\geq 10 Microns No hard solids (sand, grit)

- Accurate water analysis is critical
- Local conditions can influence system performance
- ◆ Smart Valve Technology
- ◆ 12 Year Warranty
- ◆ Factory support for the life of the unit
