Quality That Lasts!

224 Shoemaker Road • Pottstown, Pennsylvania 19464
Tel 610-323-8358 • Fax 610-323-5526 • www.masterwater.com

FEATURES

OPTIONAL REGENERATION TIMES

Timer can be set to regenerate whenever you choose.

BACKWASH OPTIONS

Optional second backwash. It's up to you!

TOUCH OF CONVENIENCE

The control valve is factory programmed with complete operational parameters. Simply set the timing schedule...
IT'S THAT EASY!

MBA® Control Valve

Bypass Valve

Series MCA Automatic, 3-Cycle Filter Control constructed of non-corrosive Noryl®. The control valve automatically starts a regeneration cycle whenever you choose. The MCA 1" control valve is designed with a unique cam assembly that makes servicing the unit a snap! The MCA control valve is guaranteed for 5 years.**

DESCRIPTION

The Simplus system uses a unique manganese based filtration media that acts as a catalyst to oxidize and then trap the precipitated sulfur. The system automatically starts a simple regeneration process of backwashing and then rinsing to remove the precipitated sulfur. A Simplus Chlorine Tank accompanies the filter to occasionally introduce chlorine into the unit during its regeneration cycle to super clean the media. The Simplus system is designed to provide years of sulfur removal without the headaches of other sulfur systems that use continuous chlorination or air induction. You will be pleased with the reliability and ease of service of the Master Simplus System.

**Detailed warranty information accompanies each water conditioner.

A detailed water analysis must be performed to assure proper system performance. Detailed equipment limitations accompany each Simplus system.

**WARRANTY

One of the best in the business!
12 year warranty on mineral tanks and brine tanks.
5 year warranty on valves.

MEMORY RETENTION

Battery free time/date retention during power failure. UP TO 2 HOURS!
Programmed information is stored permanently.

FACTORY SUPPORT

Factory technical service is available to your dealer or distributor for the life of the unit.

Finally...
Reduced discharge
is a Reality!

Vortech™

**The world's newest
bottom distribution
system improves
cleaning of the
media bed and
reduces freeboard.**

The 464 shut-off prevents air from entering the Simplus system during the draw cycle. It also maintains the proper water level in the chlorine regeneration tank.

ON SITE REQUIREMENTS

Maximum 5.0 ppm Sulfur
Maximum 2.0 ppm Manganese
Maximum 5.0 ppm Iron
Maximum 50.0 NTU Turbidity
pH range 6.8-7.8
